

EOS Bi-O Invisio

Compact-size vaporizer for EOS Invisio sauna heaters

Vaporizer for EOS Invisio series sauna heaters. Turns the sauna heater into a Bi-O version with the possibility of flexible climate setting from hot and dry to mild and humid up to your preference. Suitable for domestic and commercial use.

Your advantages:

- Universally suits all EOS Invisio sauna heaters.
- Includes stainless steel steam output pipe with herbs and essence holder - steam injection at the top edge of the partition wall for optimal and quick distribution.
- The steam exit tray can be mounted at various heights.
- Right-hand side or left-hand side mounting possible.
- Double nozzle drain allows to connect the automatic water refilling device FWA 01 and water drain line at one time.
- Made in Germany quality by EOS.
