

Cover guard

For sauna heaters. Approved fire protection solution for sauna cabins.

The cover guard makes sure that a sauna heater may not be switched on or automatically switches off if an object is placed on it. This greatly reduces the fire risk in situations as by e.g. a towel or a water bucket forgotten on the heater.

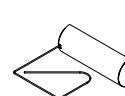

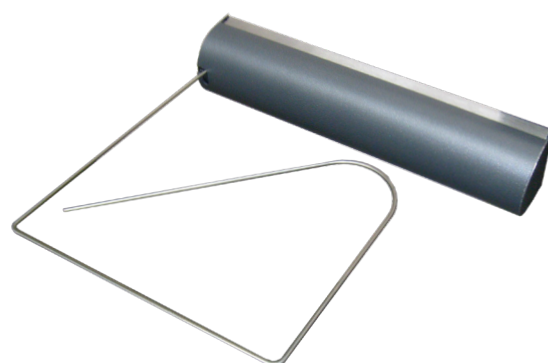

According to the norm EN 60335 all commercial and domestic sauna cabins as of May 2013 should be equipped with an approved safety system, which prevents a sauna heater from switching on or switches it off automatically if it is in unsafe condition.

Your advantages:

- Complies with latest EU norm EN 60335.
- VDE tested and approved for safety and norm compliance.
- Simple wall installation, also direct mounting or various EOS heaters possible.
- May be retrofitted in existing sauna cabins.
- Highly reliable and effective.
- 6 sizes available to suit all EOS heater sizes.
- Made in Germany quality by EOS

Specifications:

Housing :	Stainless steel, anthracite pearl effect powder coating.
Inner construction:	Stainless steel, aluminium
Rail:	Stainless steel
Installation:	Wall mounting, direct installation of certain EOS heaters possible with an optional mounting frame.
Connection:	To sauna control unit (cable not included)
